NATURAL VOICE RECOGNITION

The 10.25" radio with NAV is available with SALA HUB, a voice assistant that reacts with a bright feedback. As a smart speaker, it can respond to human queries with immediate and clear answers. The wake-word "Hey SALA" or by quickly touching the dedicated button on the steering wheel (microphone icon) will enable a different array of requests, such as the following ones. In addition, SALA Hub is compatible and interacts with "Siri" and "OK, Google" when a device is connected to the vehicle.

"I want to listen some music"

"How much does it take to reach my destination?"

"Weather info"

"Turn on/off the air conditioning"

"Hey Siri, call Marco Rossi"

"Ok Google, play my favourites playlist"

SALA vs SALA PRO + SALA HUB
